

102. (Amended) The system device as recited in claim 98 wherein said mount comprises a through-hole for penetration of a curing light.

103. (Amended) The system device as recited in claim 97 wherein said first flexure member and said second flexure member further comprises a plurality of piezo actuators attached to apply a force to rotate said body.

REMARKS

A. Response to Restriction Requirement

In response to the restriction requirement Applicants elect to prosecute the claims associated with Group I, with traverse. In the Restriction Requirement it was asserted that the pending claims defined three distinct species identified in Groups I, II and III. Specifically, independent claim 77 is associated with Group I, independent claim 87 is associated with Group II and independent claim 97 is associated with Group III. In the Restriction requirement it was asserted that claim 97 of Group III was generic to the pending claims. However, Applicants contend that claim 77 is generic, because inter alia, claim 77 does not include a limitation present in claim 97. Specifically, claim 77 includes having a body coupled to a flexure system that is adapted to position the body in a desired orientation with respect to a surface and maintain the orientation in response to a force being exerted upon the body. Claim 97 defines substantially identical features, excepting that the force is further defined as consisting of fluid pressure. As a result, it

is respectfully contended that claim 77 is generic and  
claim 97 is a species of the invention defined by claim 77.

B. Amendments to the Claims

Applicants have amended certain claims to make the invention more definite. As a result, no amendments made to the claims were necessitated to overcome prior art.

Applicant respectfully requests examination of the amended claims. A notice of allowance is earnestly solicited.

CERTIFICATE OF MAILING  
Respectfully Submitted, I hereby certify that this paper (along with any paper referred to as being attached or enclosed) is being deposited with the United States Postal Service on the date shown below with sufficient postage as first class mail in a package addressed to: MAIL STOP NON FEE AMENDMENT, Commissioner for Patents, Alexandria, VA 22313-1450

Signed: Alexis Sheffield  
Typed Name: Alexis Sheffield  
Date: 11/24/03

Respectfully,

Kenneth C. Brooks
